# What we do

1

Elluminates Software is a hybrid software and consulting company.

2

Elluminates Software's focus is on creating amazing capabilities for Developers, System Administrators and IT and Cyber Engineers and ultimately their users.

3

Our goal is to make it easier to deliver applications, easier to run applications, and easier for staff to do their job.

4

Our Professional Services have successfully supported Federal Agencies, State and Local Governments and commercial enterprises for 20 years.

# Problems we solve

1

## Platform Engineering for Developer Teams

The PE practice designs and engineers the platform for your software engineering teams so that they can easily "git push" and have everything that needs to happen to deliver a high quality production product go smoothly.

In the technical space that may include designing self-service platforms like Kubernetes, and OpenStack, or Containers. We also design Cloud services, SaaS, PaaS, IaaS, CI/CD, Developer IDEs, Zero Trust, Security scanning, Virtual Machines and much more into a unified and documented developer ecosystem for a customer's organization.

2

## Cloud and On Prem Data Center Engineering

The Cloud and Data Center practice provides design, operations and engineering of application infrastructure, such as Virtual Machines, Containers, and all the services that run applications in the Cloud and On Prem. We design and run Data Centers for the Federal Government in 200 Countries.

3

## Software Automation Development and Tooling

Our Software Automation Development and Tools practice accelerate IT Engineers, Administrators, Cyber teams and general IT processes. We are designing AI Automation capabilities for next gen tooling.

## Partnerships

## Customers (Current & Past)

Elluminates Software is an official partner of:

- Google Cloud Platform (Sell and Services)
- VMware Professional Services Partner

### Federal

- State Department  
(Vanguard 2.2.1 / DSCM / EIS)
- HHS (NGIT)
- Navy (NCIS LInX & NERMs)
- Army (CCAS & SPOT)
- Department of Justice (ITSS4/OSS)
- GSA HSPD-12 Federal ID Card Infrastructure
- United Kingdom Fire Control
- United Kingdom National ID Card (NG/TASC - Design)
- DHS TSA

### Commercial

Experian IDaaS

### State and Local

- Metropolitan Washington Airport Authority (Data Center Modernization)
- New York City (E911 Call Center Modernization)
- State of Virginia (VA FRAC)

# Automation Software Development is driving change at Federal customers

What our Automation Engineers have done already for Federal (highlights):

- Automation of all components of On Prem Hybrid Cloud components such as Software-Defined Networking, Firewalls, Storage, Physical Networking
- Automation of Cloud Infrastructure in Azure
- Automation of LEED Monitoring components (energy use of Federal Data Centers)
- Automation of Windows Domain Controllers Images
- Linux Hardening Automation
- Automation of VDI systems build outs
- Automation of Port Security and Network upgrades (in progress)
- Automation of WiFi systems (in progress)
- Multi-Tenant configuration via Automation
- Virtual Machine Migration Automation

# Demo

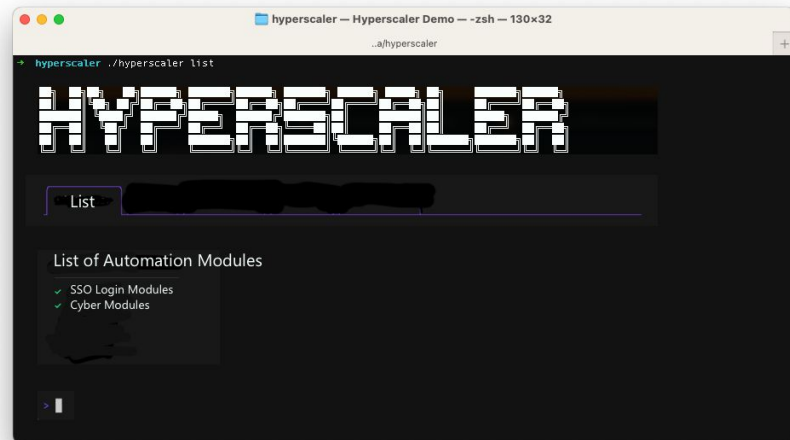

# Hyperscaler®

## The Automation Team Platform For Your Organization™

Hyperscaler® is a container-based Automation Team Platform to manage all your automation needs. Being developed by Elluminates Software, we are looking for pilot customers in the end of 2023 and in 2024 who are interested in pushing automation as Team effort:

- Web UI
- Team and Approval workflows
- Git Ops
- Visualizations of Automation In Your Organization

Works On Prem or in the Cloud.

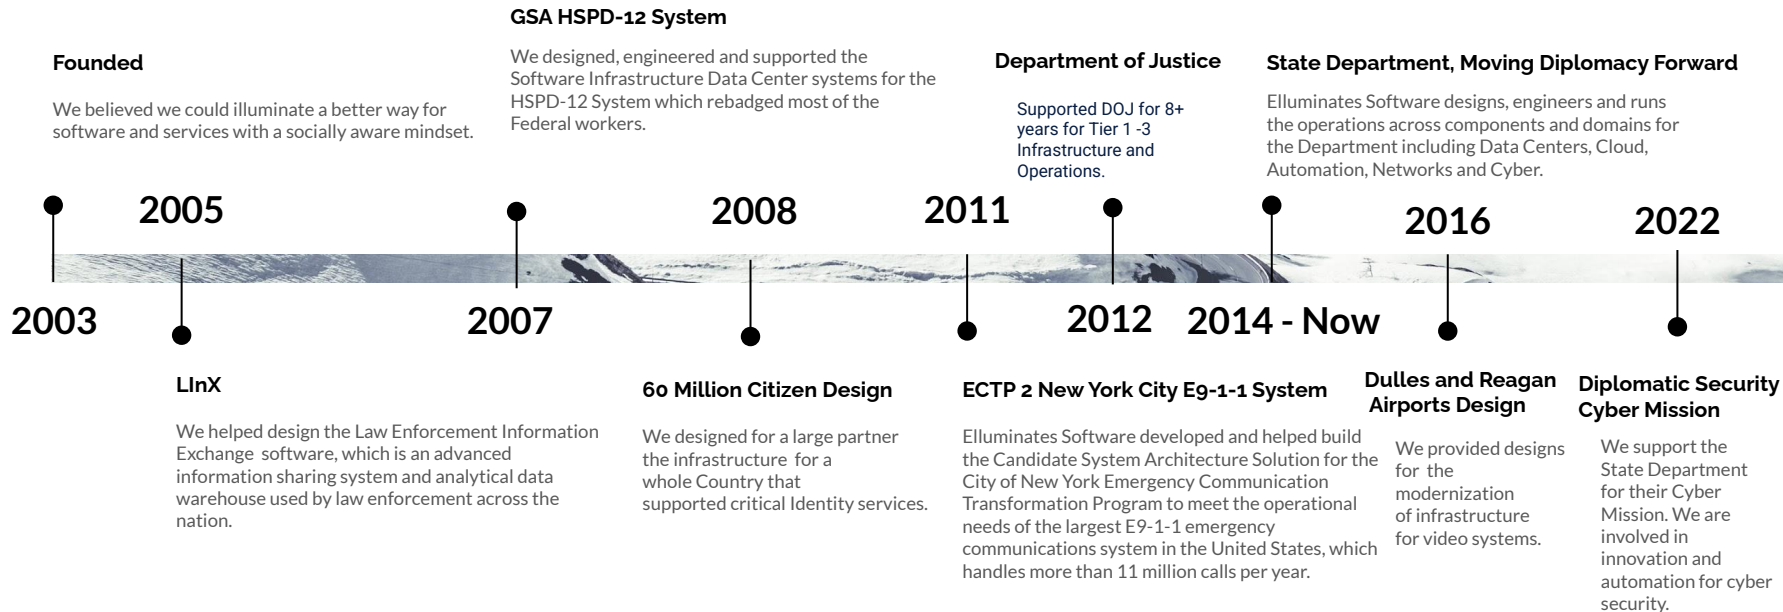

# Next Steps, MVP Selection and Staff Planning
