

Elluminates Software[®]

Winter 2024

Generated by AI

It's time to advance the State-of-the-Art for Federal

Elluminates Software is an expert in building the technology of tomorrow.

Prime Solutions Quicksheet

Our 3 Core Offerings:

1. Openvista® Intelligent Tools

Mission-Oriented SaaS Applications

We develop cutting-edge SaaS applications using Machine Learning/AI tailored for Cloud and IT Infrastructure, Cyber, and Law Enforcement. Our solutions are licensed by seat/device/use, and our forward-deployed engineers ensure seamless program mission enablement.

- **Prime Benefits:** Offer innovative technology in proposals, with the option for customer demos and tailored solutions.
- **Our Track Record:** Successful implementations include the Navy's LInX system and the Army's CCAS/SPOT software for critical operations.¹

2. Enterprise Innovation & Business Transformation

Cloud & Data Center Professional Services

Expert services focused on Cloud enablement and Data Center operations. From systems design and architecture to infrastructure engineering, we optimize Cloud use and enhance data center capabilities.

- **Prime Benefits:** As a Prime contractor, lead and manage projects while we deliver top-tier technical support.
- **Our Track Record:** Solutions include NYC's E911 system, global embassy infrastructure for the Department of State, and a Federal DNS solution handling nearly 1 billion queries annually.

¹ These software solutions used our legacy business model as work-for-hire efforts.

3. Infrastructure Automation

Automation Professional Services

Specialized in automating Cloud and On-Prem environments, we streamline operations, reduce labor costs, and minimize human errors. Our expert teams handle everything from installation and automation software development to ongoing maintenance.

- **Prime Benefits:** Direct the automation team while we bring in expert engineers to execute your vision efficiently.
- **Our Track Record:** Automation successes include Azure Cloud infrastructure, Windows Domain Controllers, VDI systems, and ServiceNow ITSM integrations.
